

# Governance & Compliance

- Consent-gated ingestion; governance\_blocked reason on denial.
- Signed artifacts (ED25519/Sigstore) for chain-of-custody (if keys available).
- C2PA/VC export suggested for downstream provenance embedding.
- Privacy lint before Left/Right routing; reject on PII hits (log).

# Auditability

Deterministic replay from region.json + overlay\_store. Reason-coded rejections give root-cause visibility (delta\_increase, parity\_fail, out\_of\_shell, plateau\_capped).
