

Publication Center v0: Methods & Reproducibility (Scratch■Pad HQ as Press)

Production Line (press run)

Intake → K-scan (prepose) → CRT Switchboard → Con-A Lift → Helix Cartography → Alena ($\lambda \approx 0.655$)
→ Seven■Witness Verify → Ledger → Governance export.

Escher stairs carry edge■first moves only; Jacob ladders permit helix shortcuts for 8→16 bundling.

Deterministic Replay

Every published figure has a residues■only replay script. Confluence ensures identical normal■form hashes for randomized reduction orders.

Falsifier Hooks

All outputs include F1–F6 harnesses (confluence break; Type■II mirage; pal witness failure; legality hallucination; energy regression; retrieval regression). Red teaming is first■class.
