

# The Game — Updated Presentation

*Card Deck • Jokers as Eye • CRT Closure*

## Why 24 rings?

$24 = \text{lcm}(2,3,4,6,8)$ . CRT with  $(\text{mod } 3, \text{ mod } 8)$  yields a unique ring in 1–24. Joker gates at 8,16,24.

## Joker as Eye

- Local: placeholder; ledger stays open pending cross-set witness.
- Global: structure call; OMPS stitch; closes both ledgers.

## Card Anatomy

- Top: ring, suit, parity; Joker mark if gate open.
- Center: residues, move rule, natural analogy.
- Bottom: upward/downward mappings; CRT notes; binding rule.

## Language as Fifth Deck

Words as tokens; grammar = snap/flip; semantics = tower; redundancy = error-correction.

## Cross-Domain Mirrors

Cards → chemistry (valence), biology (folds), language (grammar), math (lattices).
