Language as Fifth Deck — Wall

Words as tokens • Grammar as closure • Meaning as tower

Claims

- Finite alphabets $\rightarrow$ enumerated words; Zipf/entropy bounds
- Bilinear composition: root+affix; subject+predicate
- Semantic tessellations: mirrors, synonyms, polysemy spirals
- Ledgering: parse trees as snap/flip; discourse as tower

Parallels to Card Game

- Suits $\leftrightarrow$ parts of speech (operators)
- Colors $\leftrightarrow$ polarity/negation
- Jokers $\leftrightarrow$ cross-text references (citations/links) as external witnesses
